"Trust what you wear

Wear & Care
product, people, planet

From the outset, we have been committed to a global approach aimed at making our industry more virtuous. We know that, as a leader, we have an important role to play in improving practices. Our goal is to make market expectations compatible with the need to reduce our environmental impact, while improving our social footprint.

We are therefore committed to many demanding actions aimed at achieving this goal.

Day after day, year after year, we are developing more and more models made from organic and/or recycled materials. At the same time, we adhere to demanding quality standards to ensure our garments are worn and stay comfortable for a long time.

We require our production sites and partners to comply with a rigorous and strict commitment charter so that, together, we reduce our CO₂ emissions, our water consumption, our waste, etc. So that, together, we improve working conditions, diversity and equality. So that, together, we guarantee everyone the right to express their uniqueness through garments that convey sound and respectful values.

K-LOOP RECYCLED COTTON BACKPACK

Size: U 285g/m²

Backpack with front pocket • This backpack is part of the "K-loop" project • With this project, Kimood is closing the circular economy loop in the strict sense of the word • The cotton used comes from waste generated in the production of cotton items for the Kariban brand, and the KARIBAN BRANDS range • The added polyester comes from recycled PET plastic bottles • During the recycling process, tracers are added to the yarn in the form of viscose and ceramic filaments to act as a unique digital fingerprint • The tracers reflect light in a unique way and therefore carry a clear and tamper-proof code • This allows us to unequivocally store in a blockchain all the information from the processes the yarn has been subjected to • Thanks to the Aware® tracer technology and associated blockchain platform, Kimood allows the end consumer to track the entire production process • This guarantees that the product has been recycled using its own waste, with no possible alterations in the process • A special label with a QR code provides access to the Aware™ platform for direct authentication of certifications using a smartphone

We are the makers

We source the cotton, spin the yarn, knit, dye, and cut the fabric, and sew the clothes.

From start to finish, we make apparel with respect for resources, both human and natural.

we hold ourselves accountable for, paying as much attention to what goes into the work as what comes out of it.
